

# Rap Song Lyrics

## Chorus:

Create Words

Change Minds

Create future

Save lives

Irreversible violence

Dictators and tyrants

They try to shut us up but we'll never be silenced

## First Verse:

Trying to hide the gun inside of me

I keep my bullets locked so no one can see

I see your intentions to stop my expression

You silence my questions about this repression

In the face of danger you shouldn't be afraid

That is what makes me feel I wanna create

I try to piece together a word of humanity

But lose myself inside this hopeless insanity

## Second Verse:

We can bring shining culture as we nurture the future

We came from nature now we're slave to computers

All we need is education

To reverse this extermination

We spit fire these words are burning

Hearts combine the tides are turning

No reason to hide stop all your lies

You have the truth now open your eye.
